Project: Ephemeral Feeds (瞬息流)

Course: CM523 Interactive Web Design, 2025

1. Physics Engine

Matter.js (Version 0.19.0)

Briscoe, L. (2014–2023). Matter.js: A 2D rigid body physics engine for the web [JavaScript library]. GitHub.

<https://github.com/liabru/matter-js>

<https://brm.io/matter-js/>

Delivered via jsDelivr CDN:

<https://cdn.jsdelivr.net/npm/matter-js@0.19.0/build/matter.min.js>

Usage in project:

Core physics simulation, including player collision, gravity, platform rigid bodies, and collision event detection.

2. Content Delivery Network

jsDelivr (Free Open Source CDN)

ProspectOne. (n.d.). jsDelivr — A free CDN for open source [Content delivery network].

<https://www.jsdelivr.com/>

Usage in project:

Hosts and delivers the Matter.js library file with zero configuration via a public URL.

3. RSS-to-JSON Conversion API

rss2json API

Alekseykulikov. (n.d.). RSS to JSON Converter API [Web API].

<https://rss2json.com/>

API endpoint:

<https://api.rss2json.com/v1/api.json>

Usage in project:

Converts BBC RSS feeds from XML to JSON at runtime, enabling the game to retrieve live news headlines and summaries without requiring a backend server. No API key is required for basic usage. The project falls back to hardcoded headlines if the API is unavailable.

4. Live News Data Source

BBC News RSS Feeds

British Broadcasting Corporation. (n.d.). BBC News RSS feeds [RSS data feeds].

<https://www.bbc.co.uk/news/10628494>

The following category feeds are used:

Business / Economy: <https://feeds.bbc.co.uk/news/business/rss.xml>

Science & Environment: https://feeds.bbc.co.uk/news/science_and_environment/rss.xml

Technology: <https://feeds.bbc.co.uk/news/technology/rss.xml>

Politics: <https://feeds.bbc.co.uk/news/politics/rss.xml>

Usage in project:

Provides real-time news headlines and summaries that are displayed on in-game platforms.

These feeds are fetched on page load via the rss2json API and combined with a hardcoded fake news dataset.

Notes

All external resources are loaded client-side at runtime; no build tools or package managers are used.

BBC RSS feeds are publicly available and free to use for non-commercial purposes under BBC's standard terms.

The rss2json free tier may impose rate limits; the project handles failures gracefully by falling back to offline content.
